## PROJECTS

### Student Management (CRUD) — *Built Using Python* and SQL

Developed a student management system to create, read, update, and delete student records using Python and an SQL database. Utilized Python's SQLite library to interact with the database, enabling smooth data handling and manipulation for efficient student record management.

### E-commerce Website — *Built Using HTML,CSS* and JavaScript

Created a responsive e-commerce website featuring product display, filtering options, and a shopping cart. Utilized HTML and CSS for layout and design, while JavaScript handled dynamic features such as interactive product filters and cart updates.

### A Comparative Study on Customer Perception Towards Swiggy and Zomato(With Special Reference to Salem City)

Analyzed customer preferences and satisfaction levels regarding Swiggy and Zomato in Salem City, focusing on factors like service quality, delivery time, and pricing. The study aimed to identify key drivers of customer loyalty and brand preference in the food delivery market.
